**Summary of reasons
for classification:**

The DVD entitled *Untitled2.BMP* is classified as:
Objectionable.

This classification is because the publication promotes and supports the use of excrement in association with degrading or dehumanising conduct or sexual conduct.

The publication is a computer image file that depicts an act of coprophilia. For those with an interest in coprophilia, the publication serves to legitimise and encourage that interest.

The classification of this publication interferes with the freedom of expression, as set out in s14 of the New Zealand Bill of Rights Act 1990. This outcome is consistent, however, with Parliament's intention that publications falling under s3(2) of the Films, Videos, and Publications Classification Act 1993 are deemed to be objectionable. The classification is also a reasonable limitation on the freedom of expression that reflects the concern of a free and democratic society to limit the availability of publications that promote and support the use of excrement in association with degrading or dehumanising conduct or sexual conduct.
